

### Gavin Sayers

**BEng (Hons) MBA  
Associate**

#### Experience

Gavin Sayers specialises in the analysis and design of lightweight tensile structures.

Previous projects include Buckingham Palace Ticket Office, Hampshire Cricket Club Pavilion with Michael Hopkins and Partners, Edo Tokyo Museum Foyer and the Faith Zone - Millennium Dome with Eva Jiricna architects.

Long span analysis projects include the retractable fabric dome for Rothenbaum Stadium in Hamburg, the tensegrity roof for Aigle Velodrome in Switzerland, and structural analysis of Faro Stadium in Portugal and Koyang Stadium in Korea.

Since joining David Dexter Associates he has worked on projects that incorporate a number of lightweight material technologies including the Stork and Ibis Aviary at London Zoo, tensile fabric structures for Cork Bus Station and Spiky Pod with Alsop Architects, and ETFE projects such as Swinburne University Atrium in Melbourne and the National Swimming Centre in Beijing.
